true and false

- **Boolean values**
 - true
 - false
- **Boolean Operations**
 - And (&&)
 - Or (||)
 - Not(!)
- **Falsy values**
 - null, undefined, NaN, "", 0
- **Truthy values**
 - Everything else
- **== vs. ===**

Summary

- The only Boolean values are true and false
- && - both sides true
- || - either side true
- ! – reverses truth
- == equals vs. === exact equality
