Functions

Functions

- **Naming a function**
- **Anonymous Functions**
- **Parameters**
  - Too many? Ignored
  - Too few? Undefined
- **Return and Returning a value**
  - No return value? Undefined
- **Hoisting**

Functions

- **Scope**
  - Nested functions are in scope of outer function
  - Braces do not create scope
  - Global vs. Local values
  - Closure
- **Functions are "first class" – and can be passed as params**
- **Refactoring and DRY – Don't Repeat Yourself**
- **Recursion**
- **Built in functions**

Summary

- **Functions are subroutines**
- **Functions can be named or anonymous**
- **Parameters**
- **Scope**
- **Closure**
- **Recursion**
